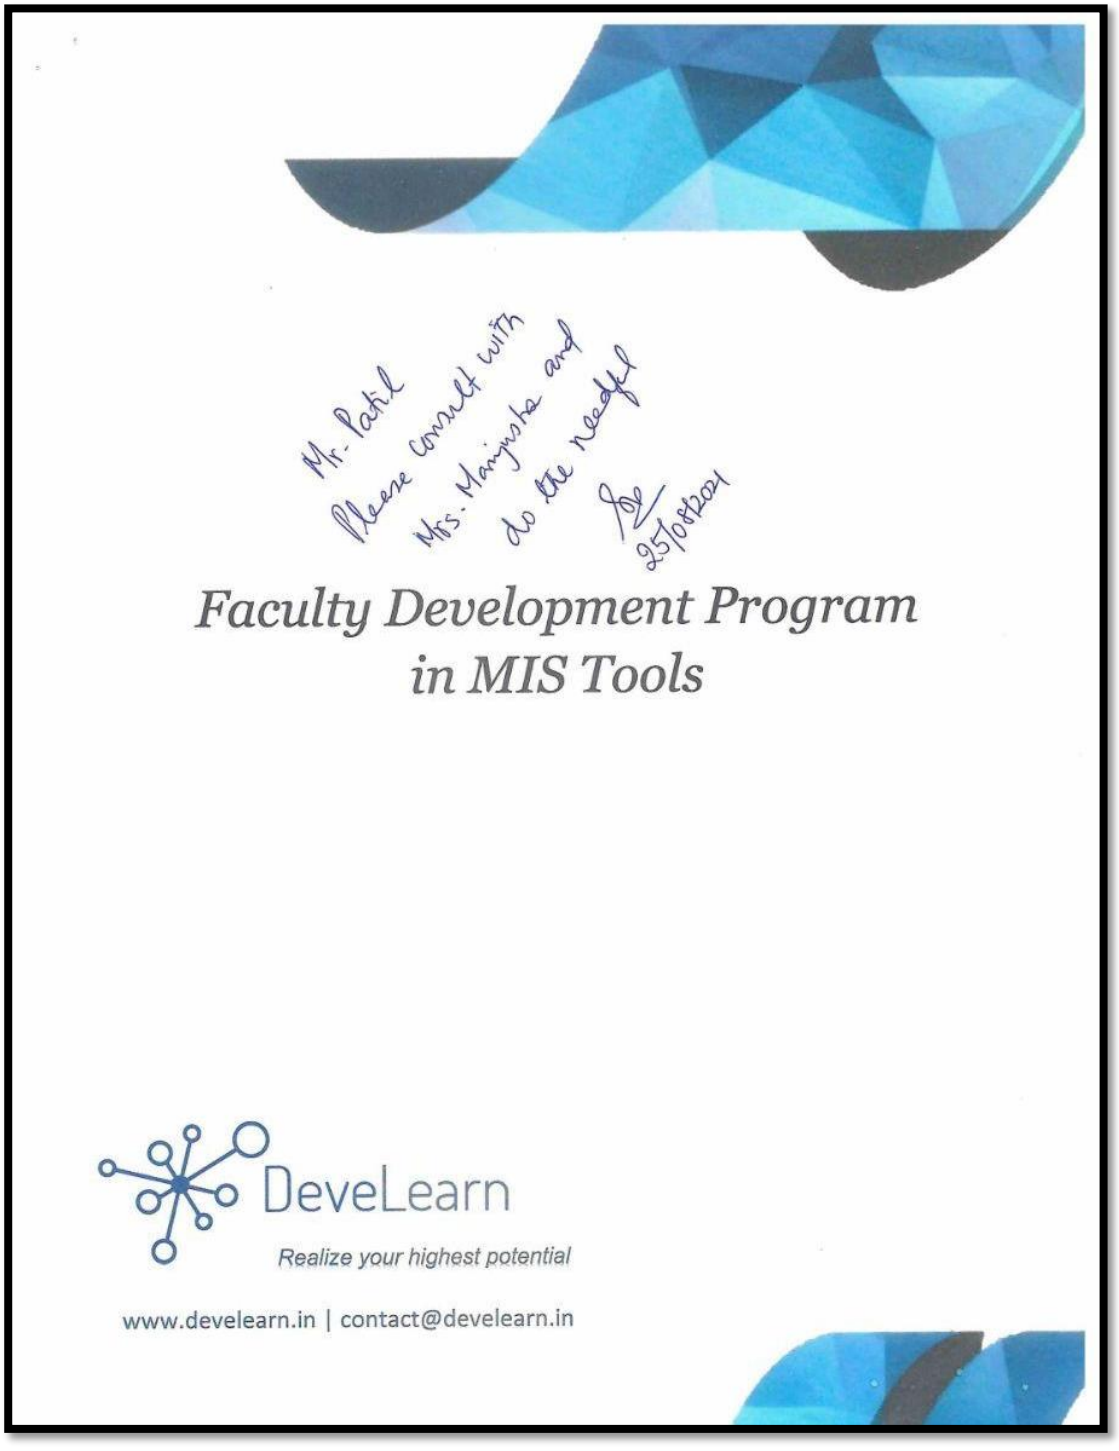
Brochure for FDP - Orientation Kick-off MS Office and Internet Productivity tools as on 28th January- 5th February, 2022 by with R. A Podar College of Commerce and Economics- RUSA 2.0 in collaboration with Develearn



DeveLearr

Introduction to Develearn

Develearn is an education and career development organization established by a team of academics & industry professionals with the vision of providing high-quality & tailored education in *IT and advanced Computer Science*. **Mentored by IIT-ians and PhD scholars**, our teaching curriculum is constantly kept up to date with the fast-paced advances in *Data Science and Artificial Intelligence*. Our biggest goal is to bring advanced education to the masses and prepare every student entering the workforce with the industry-relevant skills to give them a competitive edge against global talent.

We specialize in training students and faculty of engineering institutions in upcoming technologies from the ground up. Our approach goes simply beyond the online education model by augmenting it with live mentoring throughout the process. Each concept is built upon by **live classes** in which the students learn via **hands-on coding**. The students can personally get their doubts cleared by the mentor and their peers through our online platform. Finally, we make **all our courseware available** to them so that they can brush up their skills anytime in the future.

The technologies that will power the products of the future, are themselves powered by the minds of the next generation. We at Develearn aim to be a platform to guide our students to realize their highest potential and stay ahead of the curve.

About the FDP:

We are well within the information age and *Computer literacy* is now an essential skill to meet any employability standards for all but blue-collar jobs. Our elder generation workforce which did not graduate in the same technological climate as today, cannot be expected to be as adept to using programs that teenagers consider *Common Sense*. This sense is in fact, not common and a formal re-skilling of personnel will empower them to confidently use and exploit all the tools at their disposal for their jobs. This upgradation starts from the core of all Office Tasks in any organisation, Data & Document creation/analysis/management. This brings us to the package course on Management Information Systems (MIS) that Develearn has optimized for office administration tasks. Further, for the expedited learning of Faculty members who are already using these products to some extent, our program is made to demonstrate the uncommon & useful techniques which are never formally taught in any schooling institution that will help them make the best use of their tools and minimize time spent on administrative tasks.

Note: Throughout the course, faculty are required to have their own laptops/personal computers with a stable internet connection. If the college can provide access to their computer lab, arrangements on conduct session on campus can also be arranged. All content & teaching material shall be provided by Develearn.

DeveLearr

Course Outcomes:

By the end of this program, teachers will get a firm hold on the fundamental tools & tricks that will help them raise their daily productivity through practical hands-on examples and practice. You will also be able to start with Django web framework and Flask framework to develop web sites and web services.

A program with 16 hours of live learning will build up on the following:

1) MS Word: Formatting, View Control, Professional Document Creation
2) MS Excel: Data Management, Formulae & Mathematics, Basic Data Analysis
3) Advanced Excel: Introduction to VBA & Excel Macros
4) MS PowerPoint: Creating beautiful Presentations & effective templates/tools & tricks
5) Internet Productivity Tools: Learn all the various Google Tools that help ease the burden of manual labour on the faculty on a daily basis.

Target audience:

Faculties of all backgrounds regardless of stream or subject will find these tools useful in their day-to-day activities and benefit from the rise in productivity as a result of the same.

Program Curriculum:

Duration: 16 Hours of live sessions covered over **8 Days.**

Session/Subject	Objective	Content

Day - 1: MS Word (1/2)	How to open create write and format documents	• Home Tab
		  • Clipboard & Editing
		  • Fonts, Paragraph
		• Insert Tab
		  • Pages & Tables
		  • Illustrations & Links
		  • Comments
		  • Headers & Footers
		  • Text & Symbols
		• Design Tab
		  • Page Background
		• Page Layout Tab
		  • Page Setup
		  • Paragraph
		  • Arrange

Day - 2: MS Word (2/2)	Learn Mail merge, different views to view a page, spell	• References Tab • Table of Contents

		• Mailings Tab
		  • Create and start mail merge
		  • Write & Insert Fields
		  • Preview Results
		• Review
		  • Proofing & Speech
		  • Accessibility & Language
		  • Comments
		  • Tracking Changes
		• View
		  • Views
		  • Show & Zoom

Day - 3: MS Excel (1/3)	Create navigate and format worksheets	• Home Tab
		  • Clipboard & Fonts
		  • Alignment
		  • Numbers & Styles
		  • Cell & Cell editing
		• Insert Tab
		  • Tables & Charts
		  • Sparklines
		  • Filters, Links, Comments
		• Page Layout Tab
		  • Page setup
		  • Scale to Fit
		  • Sheet Options
		  • Arrange

Day - 4: MS Excel (2/3)	Utilize Cell ranges and references in formulas and functions	• Formulas Tab
		  • Text
		  • Date time
		  • Math, Trig & Logical
		• View Tab
		  • Workbook Views
		  • Show & Zoom
		  • Windows
		  • Basic Macros

Day - 5: MS Excel (3/3)	Data Analysis in MS Excel	• Data Validation Tab
		  • Data Tools
		  • Forecast & Outline
		• Review Tab
		  • Proofing
		  • Accessibility & Insights
		  • Language & Comments

Day - 6: MS PowerPoint (1/2)	How to create presentation and design and arrange slides	• Home Tab
		  • Slides
		  • Font
		• Insert Tab
		  • Slides & Tables
		  • Images & Illustrations
		  • Media
		• Design Tab
		  • Themes
		  • Variants
		  • Customize
		• Transition Tab

Day - 7: MS PowerPoint (2/2)	How to add animation and set slide show	• Animation Tab
		• Slide Show
		  • Start Slide Show
		  • Set Up
		• Review
		• View
		  • Presentation Views
		  • Master Views
		  • Show & Zoom
		  • Color/grayscale
		  • Window

Day - 8: Internet Productivity Tools	Information about mail and other Google tools	• Internet
		  • Gmail
		  • Drive
		  • Calendar
		  • Photos
		  • Docs, Sheets and PPT
		  • Google Contacts
		  • Google Forms
		  • Google Hangout

Final Test	**Final Assessment**	**Final Examination**

EVALUATION:

1) A small written exam shall be conducted online to test the understanding of the participants at the end of the program. This is entirely optional and can be conducted only upon the discretion of the college.

DeveLearr

Course Conduction

Teaching Methodology

- The program is typically conducted online where each attendee shall get access to their very own online dashboard once they are registered. However, Offline instruction can also be arranged on Campus grounds given adequate computer and teaching infrastructure is arranged.
- Develearn shall conduct live teaching sessions including instruction of theory and live hands-on practice through streaming apps included in the online dashboard.

Program Logistics

- Total teaching time: **16 hours**
- Number of live sessions: **8**
- Spacing between sessions can be adjusted for to run from **8 Days** to as long as **16 Days**.
- Breakdown of a live session: **Total time 2 hours**
  - Scheduled topic instruction: **60%**
  - Live programming/practice time: **40%**
  - Doubt solving & assignments: **10%**
- The expected size of registrations for the course shall be 40 - 50 Faculty.

Payment Terms

- The joint cost for this course is evaluated at **Rs. 2,000/- (+ GST) per faculty**.
- The payment can be completed in full upon completion of the 8 Days of the program. Develearn shall submit Digital and Physical invoices for the same in accordance with procedures.
  - Certificates shall be delivered to the Faculty upon successful completion of the Program.

Components of Information Systems
Data
You can think of data as a collection of facts. For example, your street address, the city you live in, and your phone number are all pieces of data. Like software, data is also intangible. By themselves, pieces of data are not really very useful. But aggregated, indexed, and organized together into a database, data can become a powerful tool for businesses.
03
01
02
Hardware
Information systems hardware is the part of an information system you can touch – the physical components of the technology. Computers, keyboards, disk drives, iPads, and flash drives are all examples of information systems hardware.
Software
Software is a set of instructions that tells the hardware what to do. Two main categories being operating-system software, which makes the hardware usable, and application software, which does something useful.
Examples of operating systems include Microsoft Windows or ios

Tips to use LinkedIn effectively
• Upload a professional picture of yourself. No mirror/bathroom selfies. Headshot.
• Give correct details of your education, experience and accomplishments
• No spelling or grammatical errors
• Like, share, comment wisely. (You are being watched by your current and future boss)
• Add, remove, and rearrange entire sections of your profile.

Where does Waste come from?
Waste comes from most things we do. The food and drinks we consume, the transport we use, the stuff we buy – everything has waste as a part of its production. Waste is the left over bits that are not a part of the final product we buy or use.
In nature, there is NO waste. Everything is used & reused by something else
